CEO MESSAGE

—————— -

Today's volatile global economy requires businesses to make the best use of resources while delivering superior products and services.

The businesses that thrive, are investing in ways that not only meet today's goals, but also position them for competitive advantage.

PROIT are uniquely placed to assist our customers and provide superior service levels.
Our strengths lies in our team of highly trained and motivated staff as well as the well established strategic partnerships we have with the most influential Original Equipment Manufacturers (OEMs) and Vendors in the industry. To this end we are proud to hold some of the most advanced technology status certifications, which set us apart from our competition.

All of us at PROIT Solutions have contributed to the company's achievements. We have successfully completed many complex and challenging projects within large government and public sector.

Integral to our success has been the ongoing execution of our services strategy and expansion. This has lead to a geographic diversity and strategic partnerships, allowing us to continuously over delivery against contracted service levels - across borders - increasing the value add in our offerings to our customers.

I would therefore like to also take this opportunity to thank our customers for their enduring loyalty to.

PROIT Solutions, our partners for continuing to collaborate and innovate with us and each one of our staff for their unwavering commitment to excellence.

WHY TECHNOLOGY IS IMPORTANT IN OUR DAILY LIFE

We have the technology available to us to enable the management of our daily lives and the sharing of valuable information with our friends, families and others. Why technology is important in our daily life. It is an essential tool that we cannot avoid, it plays an important part in the majority of our lives Technology essentially harnesses the tools, technologies and strategies used to help us solve problems and simply make our lives better and easier to live in some way.

Technology is inevitable in our everyday lives. This is because life without technology is pointless in today's dynamic world. Technology, which brings together tools to promote development, use and information exchange, has as its main objective of making tasks easier and the solving of many problems of mankind. When technology progresses and makes our lives even more convenient, we must stress how beneficial it is to our lives.

Imagine life without technology Right now, what kind of life have we? Technology is part of our lives and is one of the key elements for mankind's survival in a quick-phase world. The development of new technologies helps to save lives; it improves work and makes the world better.

In reality, technology has played a very important role in how we live in the world today and how we communicate in the atmosphere with everything around us. Impact of technology is higher than that we expected. So we are developing new innovations to live in a better and standardized life.

Some such technology helps some emerging countries to have a stronger infrastructure in place that also means better transportation, better schools, hospitals and other municipal services, and access to health care. Small and small businesses.

As a result of technological advances, they are increasing and spreading across countries. It is innovation that gives the power to spread their wings to organizations. The positive impact of technology on society has brought change and helped us to reach new heights that have never before been conceived of.

Nobody else has changed technology's way of life, and that is precisely why technology is and will always be so important today. so Technology is important in our daily life in many ways that we cannot ignore purposefully.

ABOUT US

PROIT Solutions is a dynamic business consultancy and IT solution provider enabling our clients to access our expertise in the IT and consultancy spheres.

As a solution provider in the IT market, PROIT offers a broad spectrum of end-to-end solutions to our customers.

DATA CENTER SOLUTIONS & SERVICES

With Comprehensive ,Cost efficient and packaged solutions , PRO IT Help you align your IT infrastructure with your overall business strategy.

Servers: Maximize operational effectiveness and optimize flexibility at any scale. Focused on accelerated performance, enhanced automation and simplified management, our line-up of servers can help you experience worry-free computing through: greater IT efficiency, superior IT agility and better IT reliability.

Storage: Achieve faster response times and lower your total cost of ownership (TCO) with data center and virtualization strategies designed to match your workloads. We can simplify your organization's storage with scalable, end-to-end solutions and services that are easy to deploy and use, saving you time and money, and getting your attention back on business.

Converged and Hyper Converged Infrastructure: Help reduce costs and automate operations with converged solutions that integrate servers, storage, networking and management into single solutions. Our converged infrastructure and hyper-converged solutions allow you to tailor infrastructure to your workloads within the minimum footprint.

Data Center Virtualization: Create an efficient, responsive IT environment by virtualizing your entire data center. When you reduce your data center footprint by consolidating your physical server, storage and networking hardware, you can also improve asset utilization, lower capital and power and cooling costs, reduce management touch points and accelerate IT service delivery.

Business Continuity and Disaster Recovery: Prepare your organization for disruptions of all shapes and sizes. Protect your valuable information, maintain productivity, and speed up recovery today through our business continuity and disaster recovery services.

Software Defined Data Center: Rapidly develop, automatically deliver and manage all of your enterprise applications, no matter where they reside, from one, unified platform. Benefit from a data storage facility in which all elements of the infrastructure – networking, storage, CPU and security – are virtualized and delivered as a service.

10.
